Professional Summary

High-impact **Full-Stack & Java Backend Developer** with a deep focus on building scalable, distributed systems using **Spring Boot, Java 21, and microservices**. Proven track record in architecting **HLS video streaming** and **AI-driven SaaS platforms** with high-performance storage integration via **AWS S3/DigitalOcean Spaces**. Expert in optimizing complex backend workflows, including automated **FFmpeg transcoding** and **Redis-backed** processing pipelines, while ensuring 99.9% uptime across cloud-deployed environments.

Education

Veermata Jijabai Technological Institute

Bachelor of Technology

Aug 2023 - May 2027

Mumbai, Maharashtra

Projects

Vortex - Video Streaming Platform  *Spring Boot 3.5, PostgreSQL, AWS S3/DO Spaces, Spring Security, Next.js*

- Built a **Java 21** backend with **HLS adaptive streaming**, reducing playback buffering by 45% via segmented video delivery.
- Automated transcoding using **FFmpeg** to convert raw MP4s to .m3u8 playlists, cutting processing overhead by 60%.
- Optimized storage using **AWS S3/DO Spaces** and byte-range requests, achieving sub-2s seek times for 1GB+ files.
- Secured 10+ REST endpoints using **JWT and Spring Security**, implementing RBAC to protect creator-specific metadata.
- Hosted on **DigitalOcean** with 2GB swap space and PostgreSQL tuning, eliminating 100% of OOM crashes during transcoding.

HireLyze - AI-powered Hiring Platform 

React, Express, Supabase, Google GenAI, Redis

- Engineered an AI matcher processing 1,000+ resumes via **Google GenAI** and cosine similarity, achieving 90%+ alignment accuracy.
- Developed a **Redis-backed** parsing pipeline for PDF/DOCX formats, increasing background job throughput by 3x.
- Integrated serverless APIs and **Supabase** for 300+ job postings, ensuring 99.9% uptime through real-time data sync.
- Designed a **React** analytics dashboard for compatibility scoring and insights, boosting user engagement metrics by 40%.

Evento - AI Event Management SaaS  *Next.js, React, Convex, Clerk, shadcn/ui, Tailwind, Google GenAI*

- Engineered an **AI-driven SaaS** for 100+ events, automating metadata generation to cut manual setup time by 60%.
- Deployed **2-step onboarding** (interests + location), increasing recommended event relevance by 40%.
- Devised a **2-tier subscription model** with **RBAC**, managing access for 1,000+ unique organizers and attendees.
- Integrated **QR-based ticketing** and **real-time check-ins**, enabling **sub-5s scans** and live attendance tracking.
- Developed a **dark-themed UI** using 20+ **shadcn components**, improving mobile session length by 35%.
